It gives me great pleasure to introduce to you the Annual Report of the Turin School of Development covering the academic year 2013–14.

In October 1990, the International Training Centre of the ILO, with the support of distinguished faculty from the University of Turin and other major European universities, launched a pilot initiative offering postgraduate learning opportunities to an international student body on selected topics related to development and economic growth. The first such offering was the postgraduate course on “International Trade Law.”

Since then, and in partnership with other UN organizations and the academic world, our Masters Programmes have been expanded to cover additional themes that are central to the mandate of the International Labour Organization (ILO) and other international institutions covering the areas of sustainable development, poverty reduction and job creation, global trade, good governance, culture and development, and the workplace environment.

On our campus in Turin, around 150 different programmes and courses are run each year attracting more than 4,000 people from over 180 countries. In this stimulating international environment, the Turin School of Development was created in 2009 in order to formalize the partnerships established between the Centre, UN organizations and universities. The academic year 2013–14 was another success for the Turin School of Development, during which there was an increase in the overall number of students as well as a consolidation of the financial base of the School.

The Masters Programmes of the Turin School of Development have become an integral and valuable part of the learning and knowledge-sharing mission of the International Training Centre of the ILO. I value highly the opportunity it provides to increase our outreach and enhance the ITC’s collaboration and visibility with the ILO, UN System organizations, academia, and other development actors.

Patricia O’Donovan
Director
International Training Centre of the ILO
The University of Turin, founded in the year 1404 as one of the main academic institutions in Europe, is one of the leading Italian public universities with an international reputation for high quality teaching and research.

We offer to our 67,000 students a full-fledged set of courses, aimed at providing our students with the academic competence required by the contemporary challenges of a global society.

Research is the top priority of the University of Turin - both fundamental and business-oriented research that blends skills pertaining to:
- national and international research;
- technological transfer (spin-off, patents);
- relations with local business and with the territory;
- commissioned research;
- various projects (such as EU Horizon 2020 and Structural Funds);
- cooperation and internationalization projects.

At the international level, the University of Turin is oriented to both relations with major organizations and to collaboration with developing countries. In the former field, relations with United Nations Agencies have been stepped up, above all with those already operating in Turin: the International Training Centre of the ILO through the Turin School of Development, UNICRI and UNSSC.

Several Masters Programmes have been organized or sponsored by the University of Turin, together with the Turin School of Development, for some time now. Since 2009, those programmes have come together under the banner of the Turin School of Development and receive every year a wide number of applications from many countries around the world.

Together with the UN agencies and the ILO, we share a strong commitment to decent work, improvement of education, and intercultural training. This commitment, which is part of our curricula, has proved throughout the years to be a strong asset for all those who look to the Turin School of Development as the right place to acquire and share knowledge in the several fields related to human development.

Gianmaria Ajani
Rector
University of Turin
The Turin School of Development was established in 2009 as a partnership between the International Training Centre of the ILO, UN organizations and academia.

The Masters Programmes are designed with the academic input of the University of Turin, the Politecnico di Torino, a number of other universities, and in collaboration with the ILO, WIPO, UNESCO, ICCROM, UNCITRAL and WTO.

Since 1990, over 2,000 participants from all around the world have obtained Postgraduate and Masters’ qualifications through the Turin School of Development. Many students coming from transition or developing countries are partially funded by the Turin School of Development scholarship programme.

In 2013–14, the Turin School of Development (TSD) added two new Masters Programmes to its portfolio, thereby expanding the linguistic range to include Spanish and French. In January 2014 the first edition of the Master en Patrimonio Mundial y Proyectos Culturales para el Desarrollo, started in Barcelona, and in March 2014 the first edition of the Master Gouvernance et Management des Marchés Publics en appui au Développement Durable was launched on the Turin Campus.

In addition, the PhD Programme, which was designed in 2012 in close collaboration with the ILO, expanded the following year with six new partner organizations.

In 2013–14 the School has further increased its self-sustainability and has managed to implement fully its programme in a scenario of reduced grants from donor institutions. However, I wish to acknowledge the continuous, essential support of the Compagnia di San Paolo, which is by far the most important donor of the School.

Dario Arrigotti
Director
Turin School of Development
The goal of our Masters Programmes

Our objective is to provide multi-disciplinary postgraduate learning opportunities with targeted content and effective delivery modalities which are conducive to imparting the essential competencies needed for dealing with today’s social, economic and environmental priorities at national and global levels.

The learning offers of the Turin School of Development are not intended to be in direct competition with similar programmes offered by universities; they are selected and designed with a perspective of “differentiation” through a combination of features such as:

- full involvement of specialized UN agencies and distinguished professional bodies in programme design, delivery and supervision;
- intensive delivery that meets the learning requirements of a European Master. This is possible through an optimal combination of distance learning with face-to-face interaction, together with applied project development and research work, in such a way as to minimize participants’ absence from work duties back home;
- multi-disciplinary coverage of the full range of technical competencies and professional skills for specific jobs in today’s knowledge economy;
- facilitation of access to internships with one of our institutional UN or professional partners;
- close coaching and learning support by dedicated tutors throughout the whole learning cycle.

George Jadoun
Assistant Director
Turin School of Development

The Masters are intended for:

- university graduates from developing and developed countries who intend to work in the fields of development, governance and international trade;
- professionals in the public and private sectors, UN, EU, and multilateral agencies, foundations and NGOs.

Requirements:

- successful completion of a first level university degree (of at least 3 years’ duration);
- fluency in English (evidence of English language fluency required).

Career opportunities:

TSD graduates are well prepared to meet the entry profile requirements of international companies, governments, UN agencies and the NGO sector. They are ready to assume responsible jobs of the 21st century in the fields of development and international trade.

Students are exposed to a mix of academic study and professional practice that are the “best fit” for diverse cultural backgrounds.

Fellowships

A limited number of partial fellowships may become available through contributions by public and private sponsors in Italy on a competitive basis. These partial fellowships are intended to supplement the financial capacity of participants from developing and transition countries who would otherwise not be able to pursue their studies without external financial support.
The faculty of the Turin School of Development is comprised of a mix of renowned university professors, selected from a network of premium partner universities across the globe, along with senior practitioners from the UN System and key professional bodies.

The faculty includes over 230 leading professors, professionals and UN experts from over 80 different institutions.

In addition, participants’ learning is closely supported by dedicated tutors.

As of 2014, approximately 2250 alumni have successfully completed the graduation requirements of these programmes and are currently occupying important professional positions in their respective countries or internationally.

* This figure includes the students enrolled in the 2013–14 edition of the LL.M. in Intellectual Property which took place from September to December 2013.
In the 2013–14 academic year, the School enrolled 224 students from 91 different countries, comprised of 107 women and 117 men.
The Master of Laws in International Trade Law (LL.M.) is offered by the Turin School of Development in partnership with the University of Turin, the University Institute of European Studies (IUSE) and the United Nation Commission on International Trade Law (UNCITRAL).

This course was the first postgraduate course launched in 1991 by the International Training Centre in collaboration with the University of Turin and the University Institute of European Studies (IUSE). As of the 2010–11 academic year, the postgraduate learning content has been expanded and upgraded to a first level European Master. This is in response to increasing demand for higher levels of specialization in the fields of contract law and international trade as well as the establishment of the Turin School of Development in 2009.

The LL.M. Programme is designed to provide comprehensive coverage of the topics related to the globalization of supply chains, the vast expansion in international and regional trade in goods and services, as well as the accompanying technological developments like e-commerce and digital signatures which have all contributed to increasing complexity in the legal framework governing contractual transactions in a technologically interconnected global market.

The LL.M., now in its 23rd edition, is an intensive one year course and is composed of three major learning components. The distance learning module lasts 14 weeks, the residential phase in Turin lasts 18 weeks and the preparation and submission of the thesis, four months.

Throughout the year, the participants are closely followed by two dedicated tutors.

For the 2013–14 edition of the Master, the Turin School of Development offered partial fellowships to seven eligible candidates.
**Class profile**

**Regional distribution**

- Europe and Central Asia: 68%
- Africa: 14%
- Americas: 9%
- Middle East: 9%

**2013–14 Class profile**

- Total students: 22
- Women: 13
- Men: 9
- Age range: 23–45
- Average age: 31.2
- Nationalities: 15

**Faculty**

Due to the integrated coverage of both the legal concepts and the applied practice sides of the various types of contracts in international trade, the LL.M. Programme has assembled a faculty of highly qualified law professors and experienced practitioners in order to impart to participants not only the legal knowledge for negotiating trade and related contractual issues but also the necessary competences for analysing complex situations and disputes in contracts and trade agreements.

The combination of academic resource persons and legal practitioners is a distinctive feature of this programme which enables smooth integration of theory with practice.

In the 2012–13 academic year, the LL.M. was taught by nine professors, six UN officials, and 26 practitioners, comprising a faculty of 41 lecturers.

The Scientific Committee is composed of:

- **Gianmaria Ajani**, Rector, University of Turin
- **Roberto Caranta**, Professor, University of Turin
- **Luca Castellani**, Legal Officer, UNCITRAL
- **Mario Comba**, Professor, University of Turin, President of the University Institute of European Studies
- **George Jadoun**, Chief of the Sustainable Development and Governance Programme at the International Training Centre of the ILO and Assistant Director of the Turin School of Development
The Master of Laws in Intellectual Property (LL.M.) is offered by the Turin School of Development in partnership with the University of Turin and the World Intellectual Property Organization (WIPO).

Intellectual property law is facing unprecedented challenges. Issues involving biotechnological inventions, software protection, digital rights management, as well as the uneasy relationship between copyright and the internet, raise questions which lie at the very heart of the interface between law and technology.

The LL.M. in Intellectual Property is designed to help participants acquire the skills needed to play a leading role in intellectual property rights (IPR) practice and teaching through exposure to an international and comparative approach. The curriculum aims to provide an in-depth examination of the classical topics of IP law, as well as specialized analysis of the latest developments in the fields of patents, industrial design, integrated circuits, trademarks, domain names, copyright and related rights, biotechnological patents and plant varieties as well as the internet, software, databases and e-commerce.

The LL.M. is an intensive nine months course and is structured in three major learning cycles. The distance learning modules last 13 weeks, the residential phase in Turin lasts 15 weeks and the preparation and submission of the thesis lasts two months.

The initial online phase provides the participants with a preliminary and homogeneous background and will take place from the beginning of June to the end of August.

The second phase consists of the residential part of the programme. Building upon an introductory review of economic instruments analysis of the law, this phase analyses IP protection both at national and international levels.

A Master of Laws in Intellectual Property will be awarded upon successful completion and fulfilment of the requirements of the three parts.

Throughout the year, the participants are closely followed by a dedicated tutor.

Each year, WIPO offers a number of full fellowships to cover both tuition and board and lodging. In the 2013–14 academic year, 15 full fellowships were granted by WIPO.
The diverse group of students and lecturers makes the LL.M. a truly international forum for discussion and exchange of knowledge, opinions and ideas coming from different legal systems.

In the 2013-14 academic year, the LL.M. was taught by 12 professors, 10 UN officials and 12 practitioners comprising a faculty of 34 lecturers.

The Scientific Committee is composed of:

- **Gianmaria Ajani**, Rector, University of Turin
- **Martha Chikowore**, Training Officer, WIPO Academy
- **Marcelo Di Pietro Peralta**, Director, WIPO Academy
- **Carlotta Graffigna**, Executive Director, WIPO Academy
- **George Jadoun**, Chief of the Sustainable Development and Governance Programme at the International Training Centre of the ILO and Assistant Director of the Turin School of Development
- **Alessandro Cogo**, Professor, University of Turin
- **Marco Ricolfi**, Professor, University of Turin
The Master in Public Procurement Management for Sustainable Development is offered by the Turin School of Development in partnership with the University of Turin and the United Nations Commission on International Trade Law (UNCITRAL).

The Master explores the legislative, regulatory, organizational and managerial foundations of a modern public procurement system. It prepares graduates for a wide range of executive and managerial functions connected with public procurement management and its supervision. It provides direct access to expertise from academia, international organizations and think-tanks, as well as the latest literature and cutting-edge research.

The Master is an intensive one year course and is structured in three major learning parts. The distance learning modules last 17 weeks, the residential phase in Turin lasts 18 weeks and the preparation and submission of the thesis lasts four months. Throughout the year, the participants are closely supervised by three dedicated tutors.

Most of the learning content of the Master is modularized into nine specialized modules of one week duration each, which are open to interested professionals who cannot pursue the entire Master. In 2013, 86 external participants joined the following specialized modules:

- Procurement management for goods and physical and consultancy services
- Supply chain management: logistics, insurance policies and incoterms
- Works Procurement Management
- Public-private partnerships: legal framework and competition requirements
- Sustainable procurement: social, economic and environmental considerations in public procurement
- Advanced contract management
- E-Procurement
- Balance sheet analysis and financial reporting standards for procurement practitioners
- Procurement Audit and Systems for prevention and detection of fraud and corruption

For the 2013–14 edition of the Master, the School offered partial fellowships to seven students.
The faculty of the Master is composed of renowned university professors, combined with leading practitioners from the UN System, professional associations, and the private sector. In the 2013–14 academic year, the Master was taught by 16 professors, five UN officials and 16 procurement practitioners, for a total number of 35 lecturers coming from different institutions.

The Scientific Committee is composed of:
- **Gianmaria Ajani**, Rector, University of Turin
- **Gian Luigi Albano**, Head of Research and Development, Consip S.p.A., the Italian Public Procurement Agency
- **Roberto Caranta**, Professor, University of Turin
- **Mario Comba**, Professor, University of Turin
- **Davide Vannoni**, Professor, University of Turin
- **Pietro Paolo Biancone**, Professor, University of Turin
- **George Jadoun**, Chief of the Sustainable Development and Governance Programme at the International Training Centre of the ILO and Assistant Director of the Turin School of Development
The Master in *Gouvernance et management des marchés publics en appui au développement durable* is offered in partnership with the University of Turin and the École des Études Politiques de Paris.

The Master provides participants with the relevant knowledge, tools and techniques to handle the challenges of developing and operating a public procurement system from the legislative, institutional, economic and managerial perspectives. It prepares graduates for a wide range of executive and managerial functions connected with public procurement governance and management. Through the programme, participants acquire practical expertise to cope with the various public procurement functions.

It provides direct access to expertise from academia, international organizations and think-tanks, as well as the latest literature and cutting-edge research.

The Master is an intensive one-year course and is structured in three major learning phases. The distance learning modules last 18 weeks, the residential phase in Turin lasts 20 weeks and the preparation and submission of the thesis lasts 14 weeks.

Throughout the year, the participants are closely supervised by one of the codirectors of the programme and by tutors.

The learning content of the Master during the residential phase is modularized into 19 specialized modules of one-week duration each.

- Introduction to the international public procurement legal framework
- Recent reforms of national public procurement systems
- Economic principles in public procurement
- Political, economic and financial stakes in relation with public procurement systems
- Procurement guidelines of the International Financial Institutions (IFIs)
- Programme and project cycle management
- Procurement of works
- Procurement of consultant services
- Procurement of goods and non-intellectual services
- Management of the logistic chain: incoterms, insurances and contractual responsibilities
- Contract management
- Prevention and management of claims in the public procurement process
- Procurement planning
- Risk management in public contracts
- Public private partnership
- e-procurement
- Procurement audit: fight against fraud and corruption
- Public contracts and sustainable development

For the first edition of this Master offered in French, the 2013–14 edition, the School offered partial fellowships to 16 of the 22 students.

Faculty

The faculty of the Master is composed of renowned university professors, combined with leading practitioners from UN System organizations, Multilateral Development Banks, professional associations, public sector and the private sectors.

In the 2013–14 academic year, the Master was taught by 14 university professors, six officials from International Organizations and 12 practitioners from the public and private sectors giving a total number of 32 lecturers coming from 10 different countries and 21 different institutions.

The Scientific Committee is composed of:

- **Gianmaria Ajani**, Rector, University of Turin
- **George Jadoun**, Chief, Sustainable Development and Governance Programme of the International Training Centre of the ILO and Assistant Director of Turin School of Development
- **Marie-Hélène Weber-Goubin**, Executive Director, continuous education, Sciences Po Paris
- **Mario Comba**, Professor, University of Turin
- **Guillaume Mercier**, Senior Programme Officer, International Training Centre of the ILO
- **Laurence Folliot-Lalliot**, Professor, University of Nanterre
- **Giovanni Balcet**, Professor, University of Turin
- **Roberto Caranta**, Professor, University of Turin
- **Gabriella Racca**, Professor, University of Turin
- **Coumba Diop**, Programme Officer, International Training Centre of the ILO
- **Rosario Ferrara**, Professor, University of Turin
The dynamic and complex process of development and globalization calls for an enhanced understanding of how to support more and better jobs in different development contexts. In all countries, poor and rich, the conviction is growing that labour is not a commodity, that labour markets are socially embedded, and that both the quantity and quality of employment is fundamental to responsible growth and the fight against poverty and social exclusion. In this context, the social demand for expertise in how to place decent employment at the heart of economic and development policies, and how to evaluate the impact of such policies is rising.

The Master, in its fifth edition, is a response to the need for more diverse expertise in the design and evaluation of evidence-based policies, in which international labour standards and fundamental rights at work go hand in hand with job creation and productive employment. It is intended to prepare students and professionals from both advanced and developing countries to become experts in designing, analysing and evaluating policies that place employment at the core of economic, social and development policy-making.

The M.Sc. in Applied Labour Economics for Development is offered by the Turin School of Development, the University of Turin and the Institut d’Etudes Politiques de Paris (Sciences Po) in partnership with the International Labour Organization, AFD and ECLAC and two research centres (IRD and Labor).

The Master is an intensive course of 16 months duration and is structured in three major learning cycles. The distance learning modules last 12 weeks, the residential phase in Turin lasts 16 weeks and the preparation and submission of the thesis cover nine months. Throughout the year, the participants are closely followed by two dedicated tutors.

The programme is delivered as a first level Master of Science by the Department of Economics of the University of Turin and as an Executive Master by the Institut d’Etudes Politiques de Paris (Sciences Po).
The students benefit from the fact that the courses are taught by a mix of lecturers, researchers, practitioners and experts from bilateral and international agencies. The programme builds on research findings and tools developed by the ILO, AFD, ECLAC, the World Bank and the academic and research institutions associated in the programme.

In the 2013–14 academic year, the programme was delivered by 10 professors, 14 UN officials and seven practitioners giving a total number of 31 lecturers coming from 15 different institutions.

The Scientific Committee is composed of:

- **Sandrine Cazes**, Chief, Employment Analysis and Research Unit, ILO Geneva
- **Rafael Diez de Medina**, Director of Department of Statistics, ILO Geneva
- **Nicolas Péjout**, Executive Director, Executive Education, SciencesPo, Paris
- **Marie-Hélène Weber-Goubin**, Programme Manager, Executive Education, SciencesPo, Paris
- **Alexandre Kolev**, Head, Social Cohesion Unit, OECD Development Centre
- **Jacques Le Cacheux**, Professor of Economics, Université de Pau et des Pays de l'Adour; Director, Economic Research Department, OFCE SciencesPo, Paris
- **Roberto Leombruni**, Professor of Econometrics, University of Turin; Senior Researcher, LABORatorio R. Revelli, Turin
- **Christophe Nordman**, Research Fellow, French Institute of Research for Development (IRD-DIAL), Paris
- **Lia Pacelli**, Assistant Professor, University of Turin; Research Fellow, LABORatorio R. Revelli, Turin
- **Silvia Pasqua**, Assistant Professor, University of Turin
- **Alain Henry**, Director, Etudes et Recherches, Agence Française de Développement (AFD), Paris
- **Maria Laura Sanchez-Puerta**, Senior Economist, World Bank, Washington D.C.
- **Samuel Asfaha**, Activity Manager, ITCILO
The programme offers an applied learning opportunity to explore the theoretical, conceptual and operational frameworks for management of development from a multidisciplinary perspective, i.e., integrating socioeconomic policies with in-depth understanding of the legal, institutional and managerial contexts for effective implementation of national development programmes and projects.

The content and the learning delivery methods are designed to impart to the participants the full spectrum of competencies needed in order to effectively deal with the challenges facing today’s development professionals in their pursuit of social and economic progress while preserving the living environment for future generations.

The programme’s objective is to provide for personnel aiming to work in the field of sustainable development with the analytical and operational competencies that are indispensable for effective participation in the results-based framework of national development.

The programme’s duration is one year structured in three major learning parts. The distance learning modules last 12 weeks, the residential phase in Turin lasts 18 weeks and the preparation and submission of the thesis lasts three months. Throughout the year, the participants are closely followed by four dedicated tutors for the four core modules: economics, institutional design, sociology, law and project management.

The combination of academic resource persons and development practitioners is a distinctive feature of this programme which enables the smooth integration of theory with practice.

For the 2013–14 edition of the Master, the Turin School of Development offered partial fellowships to seven eligible candidates.

**Faculty**

The core faculty is made up of senior professors from the University of Turin and other renowned international universities and development specialists from the International Training Centre of the ILO, UNDP and other UN System organizations.

In the 2013–14 academic year, the Master was conducted by 21 professors, three UN officials and four practitioners comprising a faculty of 28 lecturers.

The Scientific Committee is composed of:

- **Gianmaria Ajani**, Rector of the University of Turin
- **Astrig Tasgian**, Professor, University of Turin
- **George Jadoun**, Chief, Sustainable Development and Governance Programme of the International Training Centre of the ILO and Assistant Director of Turin School of Development
- **Jean Philippe Platteau**, Professor, University of Namur
- **Alessandra Venturini**, Professor, University of Turin
The two Masters in World Heritage and Cultural Projects for Development, one in English and the other in Spanish, aim to impart the necessary competencies and skills to participants in the conservation and promotion of World Heritage Sites, as well as in the conceptualization of sustainable projects designed around a wide spectrum of cultural activities in the fields of natural and cultural heritage, creative industries, museums and tourism.

The Programme provides a solid foundation in a variety of cultural economics topics and the value chain of cultural and natural sites. It explores in detail the economic, social, institutional and legal considerations that govern the diverse categories of UNESCO-designated World Heritage Sites.

The Programme also puts emphasis on strategic management competencies for the preservation and promotion of these sites as well as on monitoring the efficacy and adequacy of site management plans and associated cultural projects.

The English language edition of the Master takes place in Turin and is designed by the University of Turin, the Politecnico di Torino, and the International Training Centre of the ILO (ITCilo). The Spanish language edition of the Master, which focuses on Latin America, takes place in Barcelona and is designed by the University of Barcelona, the University of Turin and the ITCilo. Both Masters are supported by the UNESCO World Heritage Centre.

The Masters are structured in three major learning cycles. They start with 10 weeks of distance learning. The residential phases start in January of the following year and last between 12 and 16 weeks. The rest of the year is spent working at a distance on the finalization of a project, which is the Master thesis. Throughout the learning cycles, students are supported by two dedicated tutors for each Master.

The Masters have a strong international faculty including Professor David Throsby from Macquarie University in Sydney, Professor Allen Scott from UNCLA in Los Angeles, Professor Andy Pratt from City University London, Professor Xavier Greffe from the University of Paris Sorbonne 1 and Professor George Yudice of the University of Miami, amongst others. Officials from UNESCO and the ITCILO also teach in the Masters.

In Memoriam
In memory of the late Prof. Walter Santagata, founder of the Master - “...who was a bright source of inspiration and motivation for all his students” (a former participant of the Master) - Prof. Santagata was Professor of Cultural Economics at the University of Torino. He was Director of EBLA CENTER (International Center for Research on the Economics of Culture, Institutions, and Creativity) and CSS (Centro Studi Silvia Santagata).
The English language edition of the Master is supervised by:

- **Patrizia Lombardi**, Scientific Director, Professor and Head of the Inter-university Department of Regional and Urban Studies and Planning of the Politecnico di Torino and University of Turin
- **Giovanna Segre**, Co-Director, and Professor of Political Economy at the IUAV University in Venice
- **Peter Tomlinson**, Co-Director and Chief of Enterprise, Microfinance and Local Development at the International Training Centre of the ILO

The Scientific Committee of the English Master includes the above members plus academics nominated by the University of Turin and the Director of the Turin School of Development.

The Spanish language Master is supervised by:

- **Xavier Roigé**, Scientific Director, Dean of the Faculty of Geography and History of the University of Barcelona
- **Lluis Bonet**, Scientific Director and Professor, Faculty of Economics and Business of the University of Barcelona
- **Peter Tomlinson**, Co-Director and Chief of Enterprise, Microfinance and Local Development at the International Training Centre of the ILO

The Scientific Committee of the Spanish edition also includes two academics nominated by the University of Turin and the Director of the Turin School of Development.
The Master in Occupational Safety and Health is offered by the Turin School of Development in partnership with the University of Turin and the ILO.

In 2012–13 the first edition of the Master in Occupational Safety and Health was launched. The programme is designed to contribute to the expansion of competent OSH professionals. Becoming a safety and health professional requires multidisciplinary training. The OSH profession calls for a broad-based educational background combined with specialized knowledge in physical sciences (medicine, physics, chemistry and engineering), social sciences (behaviour, motivation and communication), and the principles and concepts of management.

The new Master in Occupational Safety and Health has been redesigned as an intensive one year course structured into three phases.

The first phase is a 20 week online distance learning module, followed by 11 weeks of residential training in Turin and then a second distance phase of 21 weeks for the preparation of the dissertation.

This first edition was especially designed and delivered only to previous participants of the Postgraduate course in Occupational Safety and Health in the Workplace. The first phase was integrated with three new modules, while the second phase was reduced to eight weeks of residential training.
The teaching team is selected for its professional experience and expertise. It consists of academics and OSH practitioners; senior professors from the University of Turin and other renowned universities; OSH experts from the ILO and other international organizations and OSH specialists working in the field.

The members of the Scientific Committee are:

- **Enrico Pira**, Professor, University of Turin, Faculty of Medicine and Surgery, Department of Traumatology, Orthopaedics and Occupational Medicine, Director II Chair of Occupational Medicine
- **Pier Giorgio Piolatto**, Professor, University of Turin, Faculty of Medicine and Surgery, Department of Traumatology, Orthopaedics and Occupational Medicine, Director I Chair of Occupational Medicine
- **Giuseppe Massazza**, Associate Professor, University of Turin, Faculty of Medicine and Surgery, Department of Traumatology, Orthopaedics and Occupational Medicine
- **Canzio Romano**, Associate Professor, University of Turin, Faculty of Medicine and Surgery, Department of Traumatology, Orthopaedics and Occupational Medicine
- **Luisa Guimaraes**, Head of the Social Protection Programme, International Training Centre of the ILO
- **Félix Martín Daza**, Senior Programme Officer, Social Protection Programme, International Training Centre of the ILO

Close to the historic heart of Turin, the campus is a unique and pleasant learning environment, with conference, training and residential facilities distributed over 21 buildings set in ten hectares of riverside parkland.

The various buildings are organized in five clusters representing the world’s continents: Americas, Africa, Asia, Europe, and Oceania.

On this compact and functional campus, people come from all over the world to live and learn together in a stimulating international environment.

Purpose-built rooms and state-of-the-art equipment help to maximize learning and knowledge-sharing.

All residential services are available for a pleasant stay, including cultural and social events in the evenings and weekends.

- 204 single bedrooms, 72 double bedrooms and 12 suites
- Reception open 24 hours a day: reception desk, porter service, shuttle service to airport, taxi service, left luggage facilities, safe, sale of bus tickets and telephone cards
- Cafeteria/canteen: large choice of meals prepared with top-quality local products, grill and pizza
- Full-service restaurant: à la carte menu with traditional Italian cuisine
- Catering services: a wide selection of options, from finger food buffets to themed banquets, incorporating the best local produce and catering to all dietary requirements
- Coffee lounge/bar with entertainment events
- Medical service
- Post office
- Travel agency
- Participant services: info desk, social events, musical entertainment, excursions, gift shop
- Internet access: free in all bedrooms and classrooms
- Internet corner open 24 hours a day
- Sport and fitness: gym, football pitch and three tennis courts
- Laundry services
- Bank
- 24h security service
Piedmont is a region of glorious contrasts and various landscapes; from the urban centre of Turin to the majestic Alps that surround the region. It caters to all kinds of tourism, including skiing and active lifestyles, high-end gastronomy and wine-tasting, world-class museums and architecture.

Turin, with its population of 1 million people, has a central location in Europe, in the north of Italy. It is easy to reach from Geneva (3 hours by car), Milan, Rome, London, Paris, Brussels and Frankfurt.

**By air** Turin’s Caselle airport is 16 kilometres north-west of the city centre. The campus shuttle service takes 30-40 minutes to get to or from Caselle airport, and little more than an hour to or from Milan’s Malpensa airport.

**By train** Turin has three railway stations: Porta Nuova, in the city centre (about 15 minutes by taxi or bus from the campus); Porta Susa (about 20 minutes); and Lingotto (about 10 minutes).

**By car** All the motorways bring you to Turin’s ring road (“tangenziale”). We recommend taking the exit marked “Corso Unità d’Italia”. The campus is about a kilometre after that exit. Parking is available.
Staff of the School

Directors

- Dario Arrigotti, Director of the Turin School of Development and Deputy Director of the International Training Centre of the ILO
- George Jadoun, Assistant Director of the Turin School of Development and Chief of the Sustainable Development and Governance (SDG) Programme of the International Training Centre of the ILO
